Work Experience

2014 - Present

LISTREPORTS
SENIOR DEVELOPER

Responsible for the front end architecture, development and deployment of responsive builds in AngularJS and Node.js in an agile environment with modern workflows for custom themes using SASS, automation via Gulp and Ansible, and Git version control. Designed and implemented web based content management systems for internal administration, drag and drop asset management and monitoring with real time updates, optimized for rapid content publishing and QA.

2011 - 2014

SPOT411 TECHNOLOGIES, INC. dba TVplus
SENIOR DEVELOPER

Developed large scale content management and publishing systems, built on an AngularJS, MongoDB, Python and Tornado stack. Collaborated with designers, engineers and digital marketing teams from major TV networks including FOX, CBS, MTV and Discovery, to integrate with mobile and web SDKs and push live responsive html content within high visibility apps. Built microsites targeting video streams, touch enabled galleries and interactive polls across various platforms.

2010 - 2011

LAZY EDDY, INC.
CO-FOUNDER, FRONT END DEVELOPER

Responsible for the UI design and front end development of a map based apartment search web application. Produced an animated marketing video clip in After Effects.

2010

FUN PER SECOND, LLC
2D ARTIST

Created the splash screen and character concept art for the iPhone game Wars of Celestae.

2009

FREELANCE WORK

Set up the company website for The Ink Pot, a publishing service based in India. Worked with jQuery for basic navigation, transitions and picture galleries. Designed the poster and built the marketing webpage for The Garden of Life, a game made by students at USC's Game Pipe Lab. Created the poster art and press kit for Staging Hope, a documentary film.
